**Subject:** Due 8/26/2019: Review of Removal Completions and non-CERCLA/EPCRA/CAA 112(r) contaminants

**Due Date:** COB 8/26/2019

**Contact:** Rob Fox, [fox.rob@epa.gov](mailto:fox.rob@epa.gov) 202-564-1538 or 202-816-2173.

**Instructions:**

Find the attached file listing the removal completions from FY17, FY18, and so far in FY19 which included a contaminant not listed on the CERCLA/EPCRA/CAA 112(r) list of contaminants and was not a waste with characteristics that classify it as a recognized category of hazardous waste. If a single contaminant not from that list was part of the removal completion, then that removal completion is listed in this file.

We are looking to make sure that we are counting these actions correctly. If your region is aware of information that makes it so a particular removal completion should not be included on this list, please flag that. For instance, if the "HERBICIDES" present at a removal completion refers to CERCLA designated contaminants, flag that and OEM will know to discard that removal completion from the final list. In addition, if a contaminant would have been characterized as a hazardous waste category (such as D001), then that would also be flagged for OEM to remove from the list.

The first worksheet, titled "non-CERCLA" has the list of all removal actions completed in FY17, FY18 and FY19 so far where at least one non-CERCLA contaminant is present. There are 94 removal actions fitting the criteria.

The second, "Contaminants notes" has the contaminants that came from all the removal actions for that period and that aren't an apparent match for one of the CERCLA contaminants or hazardous waste categories. The notes for decisions made on individual contaminants are present. These are the contaminants that are present in the removal completions list in the "non-CERCLA" worksheet.

The third worksheet, "List of Lists by name" is the CERCLA/EPCRA/CAA 112(r) list from EPA's website, for reference.

**Background:**

This is in response to an inquiry from Senate staff.

**Attachments:** non-CERCLA contaminants first cut 2019.8.22.xlsx
